## AI Oversight - One-page Board Briefing

### WHY IT MATTERS

---

AI is already influencing decisions, data, and outcomes - often without explicit board awareness.

### PRIMARY RISKS

---

- Undefined accountability and decision rights
- Unclear data usage and compliance exposure
- Accelerated errors and inconsistent oversight
- AI operating outside existing governance frameworks

### BOARD QUESTIONS TO ASK

---

- Where is AI already in use today?
- Who owns AI accountability?
- What data does AI access or influence?
- How does AI change risk, not just efficiency?
- What does responsible adoption look like in 12 months?

### BOARD TAKEAWAY

---

Boards do not need deep technical expertise to govern AI. They need clarity of ownership, integration with risk oversight, and disciplined expectations for responsible adoption.
